 Donald Gray
 Winifred McCulloch
 Gertrud Mellon

A noted authority on both Teilhard and Mendel, Edward O. Dodson is a Professor Emeritus at the University of Ottawa. He received his Ph.D. in cytology and genetics from the University of California at Berkeley. His academic appointments include the Dominican College of San Rafael, Notre Dame and many visiting professorships here and abroad. Dr. Dodson was Professeur invite with the Fondation Teilhard de Chardin in Paris for 1971-1972.

The author of encyclopedia articles on Mendel, zoology, the origin of species, evolution and phylogeny and of numerous technical papers, he has also written a standard text in use for over two decades, *Evolution: Process and Product*. Dr. Dodson's latest work, *The Phenomenon of Man Revisited*, published this year by Columbia University Press, achieves a new rapprochement between Teilhard's evolutionary thought and the modern synthesis.
